

Route map through assessment

Course: Design and Manufacture

Level: National 4

This document is intended to assist staff in planning and delivering the overall vision for Curriculum for Excellence.

The vision for the new national qualifications is to create assessment opportunities that follow and support learning and teaching. This follows the principles laid out in *Building the Curriculum 5* and makes assessment a natural part of learning and teaching.

This route map aims to signpost all of the relevant material that is available to support your subject. Your professional judgement is vital and the documents listed below are intended to support you in deciding the most appropriate ways to generate evidence and assess learners.

Education Scotland has produced a professional focus paper for design and manufacture, and this is a good starting point as it provides support to help develop learning and teaching approaches that take forward the purposes and principles of Curriculum for Excellence through Design and Manufacture National 4.

Design and Manufacture National 4 course content

This is a new course replacing Craft and Design and Product Design. Skills, knowledge and understanding will continue to be integrated but the unit titles are different: evaluating, research techniques, idea generation, using tools, equipment and software, modelling, planning, design factors, manufacturing process and materials properties and uses.

The main SQA design and manufacture page is found at <http://www.sqa.org.uk/sqa/45645.html>, with pages specifically relating to National 4 at <http://www.sqa.org.uk/sqa/47450.html>. Staff should also regularly check the updates and announcements section of this page.

The course specification can be found at

http://www.sqa.org.uk/files_ccc/CfE_CourseSpec_N4_Technologies_DesignandManufacture.pdf.

There are two units: Design and Manufacture: Design, and Design and Manufacture: Materials and Manufacturing.

Design and Manufacture: Design: This unit focuses on the product design process from brief to resolved design proposals, including specification.

Design and Manufacture: Materials and Manufacturing: This unit focuses on the product design process from the design proposal to prototype and product.

To gain an award at National 4 learners must complete both units as well as the Added Value Unit.

Added Value Unit

The assignment introduces challenge and application. Learners will produce an effective overall response to a brief, which will include a folio, a model, or a prototype, or a completed product. This will be internally assessed. http://www.sqa.org.uk/files_ccc/CfE_Unit_N4_DesignandManufacture_AddedValueUnit.pdf

Verification

The verification process is designed to be supportive and not onerous.

Internal verification is the process of ensuring standards are applied uniformly and consistently within a school in line with national standards. External verification is the process of ensuring that national standards are maintained consistently across all schools.

Quality assurance: <http://www.sqa.org.uk/sqa/58448.html>.

Prior verification

http://www.sqa.org.uk/files_ccc/Prior%20Verification%20Centre%20Guidance%20FINAL.pdf

Staff who devise their own assessments can send them to SQA for prior verification, free of charge. This is only necessary where significant changes have been made to the unit assessment provided. It gives departments confidence that their proposed assessment is fit for purpose and meets national standards.

Internal verification

http://www.sqa.org.uk/sqa/files_ccc/InternalVerificationGuideforSQAcentres.pdf

As a matter of course staff should be quality assuring their assessments by carrying out activities that they have always done for NABs, for example double marking and blind marking. A sample of learners' work should be marked by more than one staff member in a department, and in single-person departments an arrangement should be made with another local authority school.

External verification

In design and manufacture schools will submit a sample of learners' evidence for scrutiny by subject-specialist qualification verifiers. SQA intend that every school will be verified over the first few years. Verification will take place in November, February and May. Twelve samples will be asked for.

http://www.sqa.org.uk/sqa/files_ccc/Evidence_required_for_verificationevents.pdf

Schools must retain the evidence until 31 July of each academic year.

http://www.sqa.org.uk/sqa/files_ccc/SQA_Evidence_retention_requirements_A3_table.pdf

Key messages from verification will be put up on the SQA website.
